

Sathish

My Portfolio | Software Engineer
Sriperumbudur , kanchipuram dt - 602105 | 9894685596

SKILLS

FRONTEND TECHNOLOGIES

HTML • CSS • SASS • Bootstrap
Javascript (ES6 +) • React Js • Redux •
Mobex • Material UI • Ant Design

BACKEND TECHNOLOGIES

BASIC KNOWLEDGE

Asp.net web Api • Entity FrameWork
• SQL Server

TOOLS & OTHERS

Debugging • Problem Solving • GIT
Hub • Bitbucket • Jenkins • Postman

COURSEWORK

FULL STACK DEVELOPMENT | BESANT TECHNOLOGY

Successfully Completed an intensive
Full Stack Development , gaining
hands-on experience in Front-end ,
back-end, and database technologies

EDUCATION

AGNI COLLEGE

B.E IN MECHTRONICS
2022 | Chennai
Cum. GPA: 8.63 / 10

SRI KARPAGA POLYTECHNIC

DIPLOMA IN MECHANICAL
2019 | Kanchipuram
80 percentage

HSC

GENERAL IN COMPUTER SCIENCE
2018 | sriperumbudur
82 Percentage

PROFESSIONAL SUMMARY

- Experienced React.js Developer with 2+ years building dynamic web apps using JavaScript (ES6+), React.js, and Redux, plus back-end skills in C, Entity Framework, and SQL Server, committed to delivering scalable, user-focused solutions.

WORK EXPERIENCE

NOVAC TECHNOLOGY SOLUTIONS | SOFTWARE ENGINEER

Aug 2025 -- Present | Chennai, India

- Built and optimized responsive UIs with React.js and Redux, improving performance and usability for complex applications.
- Delivered mobile-first, cross-browser solutions using Bootstrap, Material-UI, and Ant Design, meeting accessibility standards.

NOVAC TECHNOLOGY SOLUTIONS SOFTWARE ENGINEER TRAINEE

May 2023 -- May 2024 | Chennai, India

- Assisted in developing front-end features with React.js and integrating APIs using ASP.NET Web API.
- Collaborated in Agile sprints, using Git for version control and learning best practices from senior engineers.

ACHIEVEMENTS :

Received the star of Quarter award Q2 2023 - 2024

PROJECT

E-COMMERCE [Live Link](#)

- **Dynamic Product Management and Cart System:** Developed an interactive product catalog with dynamic cart functionality, where users can add, remove, and view items, while leveraging React's state management to store cart details in local storage for persistent user experience.
- **E-commerce Platform with User Authentication:** Built a e-commerce website in React.js, incorporating a user login system with local storage for session management, allowing users to log in and maintain their session across page reloads.

FOOD ORDER [Live Link](#)

- **Dynamic User Interface with Real-time Cart Management:** Developed a responsive and interactive food ordering website using HTML, CSS, and JavaScript, featuring an intuitive interface that enables users to add, remove, and update food items in the cart with real-time dynamic updates for a seamless shopping experience.
- **Smooth and Efficient Checkout Process:** Implemented a user-friendly checkout system that manages orders, displays itemized lists, and dynamically updates the total price using JavaScript, ensuring a streamlined and efficient transaction flow.
